

IN MEMORY of TITU ZVONARU
a valuable contributor to
MATHEMATICAL REFLECTIONS

- Authored numerous mathematical articles, distinguished by their clarity of thought and expression, and conveyed the joy inspired by the beauty of mathematics
- Collaborated with many mathematicians, with a special interest in topics such as mathematical recreations, number theory, synthetic geometry, and inequalities.
- Captivated others with the simplicity and clarity of his solutions.
- Generous with his support to others, and succeeded in passing on his passion for mathematics to future generations through elegant problems and insightful articles.
