

Contents

1	Some Useful Substitutions	1
1.1	Theory and examples	3
1.2	Practice Problems	20
2	Always Cauchy-Schwarz...	25
2.1	Theory and examples	27
2.2	Practice problems	43
3	Look at the Exponent	51
3.1	Theory and examples	53
3.2	Practice problems	71
4	Primes and Squares	77
4.1	Theory and examples	79
4.2	Practice problems	93
5	T2's Lemma	97
5.1	Theory and examples	99
5.2	Practice problems	115

6	Some Classical Problems in Extremal Graph Theory	119
6.1	Theory and examples	121
6.2	Practice problems	132
7	Complex Combinatorics	137
7.1	Theory and examples	139
7.2	Practice Problems	154
8	Formal Series Revisited	159
8.1	Theory and examples	161
8.2	Practice problems	179
9	A Brief Introduction to Algebraic Number Theory	185
9.1	Theory and examples	187
9.2	Practice problems	206
10	Arithmetic Properties of Polynomials	213
10.1	Theory and examples	215
10.2	Practice problems	235
11	Lagrange Interpolation Formula	241
11.1	Theory and examples	243
11.2	Practice problems	267
12	Higher Algebra in Combinatorics	271
12.1	Theory and examples	273
12.2	Practice problems	290
13	Geometry and Numbers	299
13.1	Theory and examples	301
13.2	Practice problems	319
14	The Smaller, the Better	325
14.1	Theory and examples	327
14.2	Practice problems	339

15 Density and Regular Distribution	345
15.1 Theory and examples	347
15.2 Practice problems	362
16 The Digit Sum of a Positive Integer	367
16.1 Theory and examples	369
16.2 Practice problems	383
17 At the Border of Analysis and Number Theory	387
17.1 Theory and examples	389
17.2 Practice problems	406
18 Quadratic Reciprocity	413
18.1 Theory and examples	415
18.2 Practice problems	433
19 Solving Elementary Inequalities Using Integrals	437
19.1 Theory and examples	439
19.2 Practice problems	457
20 Pigeonhole Principle Revisited	463
20.1 Theory and examples	465
20.2 Practice problems	485
21 Some Useful Irreducibility Criteria	491
21.1 Theory and examples	493
21.2 Practice problems	513
22 Cycles, Paths, and Other Ways	519
22.1 Theory and examples	521
22.2 Practice problems	533
23 Some Special Applications of Polynomials	537
23.1 Theory and examples	539
23.2 Practice problems	557

Bibliography	563
Index	570
